Everi Holdings Inc.
Conflict Minerals Report
For the Year Ended December 31, 2022

This Conflict Minerals Report for the reporting period from January 1, 2022 to December 31, 2022 (this “Report”) is made pursuant to Rule 13p-1 (the “Rule”) under the Securities Exchange Act of 1934, as amended. The Rule was adopted by the Securities and Exchange Commission (“SEC”) to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule requires public reporting companies to determine whether 3TG minerals (as defined below) are necessary to the functionality or production of products they manufacture, or contract for manufacture; and if so, to disclose annually whether any of those 3TG minerals originated in the Democratic Republic of the Congo (“DRC”) or countries that share an internationally-recognized border with the DRC (each, an “adjoining country”; DRC and adjoining countries, each, a “Covered Country”). The term “Conflict Minerals” means cassiterite, columbite-tantalite (coltan), gold, wolframite and their derivatives (tantalum, tin, and tungsten) (collectively, “3TG minerals”) originating from a Covered Country.

Company and Product Overview

Unless otherwise indicated, the terms the “Everi Holdings,” “Everi,” “Company,” “we,” “us,” and “our” refer to Everi Holdings Inc. together with its consolidated subsidiaries.

Everi develops and offers products and services that provide gaming entertainment, improve our customers’ patron engagement, and help our casino customers operate their businesses more efficiently. We develop and supply entertaining game content, gaming machines and gaming systems and services for land-based and iGaming operators. Everi is a provider of financial technology solutions that power casino floors, provide operational efficiencies, and help fulfill regulatory requirements. The Company also develops and supplies player loyalty tools and mobile-first applications that enhance patron engagement for our customers and venues in the casino, sports, entertainment and hospitality industries.

Everi reports its financial performance, and organizes and manages its operations, across the following two business segments: (i) Games and (ii) Financial Technology Solutions (“FinTech”).

Everi Games provides gaming operators with gaming technology and entertainment products and services, including: (i) gaming machines, primarily comprising Class II, Class III and Historic Horse Racing (“HHR”) slot machines placed under participation or fixed-fee lease arrangements or sold to casino customers; (ii) providing and maintaining the central determinant systems for the video lottery terminals (“VLTs”) installed in the State of New York and similar technology in certain tribal jurisdictions; and (iii) business-to-business (“B2B”) digital online gaming activities.

Everi FinTech provides gaming operators with financial technology products and services, including: (i) financial access and related services supporting digital, cashless and physical cash options across mobile, assisted and self-service channels; (ii) loyalty and marketing software and tools, regulatory and compliance (“RegTech”) software solutions, other information-related products and services, and hardware maintenance services; and (iii) associated casino patron self-service hardware that utilizes our financial access, software and other services. We also develop and offer mobile-first applications aimed at enhancing patron engagement for customers in the casino, sports, entertainment, and hospitality industries. Our solutions are secured using an end-to-end security suite to protect against cyber-related attacks, allowing us to maintain appropriate levels of security. These solutions include: access to cash and cashless funding at gaming facilities via Automated Teller Machine (“ATM”) debit withdrawals, credit card financial access transactions, and point of sale (“POS”) debit card purchases at casino cages, kiosk and mobile POS devices; accounts for the CashClub Wallet, check warranty services, self-service loyalty and fully integrated kiosk maintenance services; self-service loyalty tools and promotion management software; compliance, audit, and data software; casino credit data and reporting services; marketing and promotional offering subscription-based services; and other ancillary offerings.

We manufacture, or contract for manufacture with third parties, our electronic gaming machines, kiosk and related products, cabinets, computer assemblies, screens, printers, bill validators, and acceptors and other wiring and harnesses (collectively, the “Equipment”). We have facilities in Austin, Texas and Las Vegas, Nevada, where we assemble the Equipment.

Reasonable Country of Origin Inquiry

We are an assembler of products and are not involved with the mining and sourcing of the raw materials, including any potential 3TG minerals. The smelters or refiners (“SORs”) of the 3TG minerals are consolidating points of raw ore and are in

the best position in the total supply chain to ascertain the origin of the ores. Based on our assessment, we determined that the Equipment we manufactured, or contracted for manufacture, in 2022 may contain certain 3TG minerals that are necessary to the functionality or production of our finished goods. Therefore, we are subject to the reporting obligations of the Rule and our Equipment is covered by this Report.

To perform our reasonable country of origin inquiry (“RCOI”), we conducted a survey of our direct suppliers using the Responsible Minerals Initiative (“RMI”) Conflict Minerals Reporting Template (the “CMRT”) developed by the Responsible Business Alliance and the Global e-Sustainability Initiative. In the survey, we asked those suppliers: (a) whether the products they supply to us (or their components) contained 3TG minerals; and (b) if they did, to provide information regarding the source of 3TG minerals contained in those products and components. As a downstream company, we relied on our suppliers to provide us with information about the source of 3TG minerals contained in the products and components they supplied to us.

We distributed the CMRT to our relevant, direct suppliers and received a response rate of approximately 96%. We excluded, as not relevant, those suppliers that: (a) did not provide us materials during the reporting period; or (b) provided materials that did not contain 3TG minerals or were not utilized in the manufacture of our Equipment during the reporting period. Based on the responses we received from our relevant suppliers in connection with our RCOI, we concluded that we have insufficient information to reasonably determine either that: (a) no 3TG minerals used in our Equipment may have originated in a Covered Country; or (b) any such Conflict Minerals originated from recycled or scrapped sources (as defined in Section 1, Item 1.01 (d)(6) of Form SD). Accordingly, we conducted additional diligence on the source and chain of custody of 3TG minerals used in the manufacture of our Equipment.

Source and Chain of Custody Due Diligence

Due Diligence Plan

We performed our source and chain of custody due diligence measures with guidance from the Organization for Economic Cooperation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High Risk Areas, Third Edition (as described below, including the use of CMRT), as tailored for “downstream” companies like ours, by performing the following steps:

Management processes and systems

We have a cross-functional team comprised of executives and experienced personnel with a demonstrated knowledge of our technology, products, and vendor relationships to support our source- and chain-of-custody due diligence. Our system of control and transparency consists of the CMRT and a review of the risks identified as a result of that process. In an effort to strengthen the engagement with our suppliers, we request smelter- and refiner-level information in connection with the CMRT. A list of these smelters, which were reported to us for the year ended December 31, 2022, is included in Annex I to this Report.

We include questions in our CMRT for prospective new suppliers that address the use of Conflict Minerals. In addition, we require suppliers that utilize in-scope materials to provide an affirmative answer regarding the use of 3TG minerals and to make certain representations that they will cooperate with our efforts to conduct appropriate due diligence and comply with the Rule. We also integrate our Conflict Minerals reporting requirements into our internal control procedures for supplier qualification by: (a) incorporating identifiers with respect to vendors who provide products containing 3TG minerals; and (b) providing the ability for employees to contact our ethics hotline to confidentially communicate any concerns regarding the circumstances surrounding the acquisition of supply chain materials from potentially conflicted sources.

Identify, assess, and respond to risks within our supply chain

We evaluate CMRT responses from our relevant direct suppliers with respect to the SORs utilized to process the minerals used in our Equipment throughout our supply chain. We utilize risk-based criteria to determine those relevant direct suppliers that warrant further due diligence, and follow up to clarify responses with suppliers that may be sourcing or processing 3TG minerals from a Covered Country. The risk-based criteria include, but are not limited to: (i) incomplete responses; (ii) apparent lack of supplier diligence; and (iii) inconsistencies in the data reported to us in the CMRT.

Support the development and implementation of independent third-party audits of SORs’ sourcing

As a downstream company, we do not have direct relationships with SORs that produce the 3TG minerals within our supply chain. Accordingly, we rely on the RMI’s list of conflict-free SORs and do not perform or direct audits of these entities’ supply chains with respect to 3TG minerals.

Report on supply chain due diligence

This Report is publicly available in the investor relations section of our corporate website at <https://www.everi.com/investor-relations/financial-reports/sec-filings/> and is filed publicly with the SEC.

Due Diligence Implementation and Results

In connection with our commitment to monitor the due diligence approach, we continue to evaluate whether further inquiry of any of our relevant direct suppliers would result in information that may differ from, or be inconsistent with, any of the responses provided to our CMRT which may give us reason to believe that the products supplied to us were sourced from a Covered Country.

3TG minerals are necessary to the functionality of our Equipment. Data provided to us by our relevant direct suppliers in response to our CMRT does not identify any Conflict Minerals within our supply chain; however, as a downstream company, we were unable to definitively determine that 100% of the 3TG minerals were sourced from internationally recognized and compliant source countries.

Steps to Improve Due Diligence

Below are the steps that we are, and will be considering taking to improve the due diligence process and further mitigate any risk that 3TG minerals in our Equipment could benefit armed groups in a Covered Country:

- Review our supply chain policy for clarity regarding minerals originating from conflict-affected and high risk areas;
- Promote supplier partnerships that are outside of the DRC zone;
- Engage with any of our suppliers found to be supplying us with 3TG minerals from sources that support conflict in the Covered Countries to establish an alternative source of 3TG minerals that does not support such conflict;
- Enhance the use of tools that help automate our supplier due diligence procedures; and
- Continue to make available Conflict Mineral educational materials to all our employees.

Forward-Looking Statements

This special disclosure report contains “forward-looking” statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the Private Securities Litigation Reform Act of 1995, as do other materials or oral statements we release to the public. Forward-looking statements are neither historical facts nor assurances of future performance, but instead are based only on our current beliefs, expectations, and assumptions regarding the future of our business, plans and strategies, projections, anticipated events and trends, the economy, and other future conditions, as of the date on which this report is filed. Forward-looking statements often, but do not always, contain words such as “expect,” “anticipate,” “aim to,” “designed to,” “intend,” “plan,” “believe,” “goal,” “target,” “future,” “assume,” “estimate,” “indication,” “seek,” “project,” “may,” “can,” “could,” “should,” “favorably positioned,” or “will” and other words and terms of similar meaning. Readers are cautioned not to place undue reliance on the forward-looking statements contained herein, which are based only on information currently available to us and only as of the date hereof.

Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent risks, uncertainties and changes in circumstances that are often difficult to predict and many of which are beyond our control.

This special disclosure report should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended December 31, 2022 and our Current Report on Form 8-K filed on March 1, 2023 and the information included in our other press releases, reports and other filings with the SEC. Given these risks and uncertainties, there can be no assurance that the forward-looking information contained in this special disclosure report will in fact transpire or prove to be accurate. Understanding the information contained in these filings is important in order to fully understand our reported financial results and our business outlook for future periods.
